XG (EXPECTED GOALS)

A metric that assigns to every shot a probability (based on historical stats) of how likely it is to score from the position, type of assist, preceding events etc. A modern metric that allows to study the results of the matches with more stress on predictability of moments creation and less on pure luck.

XG2

A post-shot probability (using same algorithm as xG) of the shot on target being scored.

ATTACK CONTRIBUTION (XGCHAIN)

A metric that assigns the xG value of a shot to every player that made any action in the attack that led to the shot. A general-purpose metric for attacking contribution.

BUILD UP (XGBUILDUP)

xGChain not counting the xG value of the actual shot and the xA value of the shot assist. This metric is most useful to evaluate player contribution in deeper-lying playmaking or buildup play.

CROSS

A ball played from a flank of the pitch aimed to find a teammate in the area in front of the goal.

LONG PASS

A targeted or untargeted pass, longer than 45 meters for a ground pass or typically longer than 25 meters for high pass.

QUICK BREAK

A goalkeeper pass that is followed by a shot of the teammate with 14 seconds.

DEFENSIVE DUEL

A duel that happened when opponent team was in the possession of the ball.

SWEEP

A goalkeeper recovery outside own penalty area.

RECOVERY

Any action that ends a possession of the opposition team and starts a possession for current team.

LOSS

Any action that ends a possession of the current team.

DANGEROUS LOSS

A loss on own half that leads to a shot by the opponent within 20 seconds.
